

Referral Letter

6 August 2026

Dr. Sarah Mitchell
Department of Cardiology
St. James Medical Center
45 Greenfield Avenue, Cape Town, 8001

Dear Dr. Mitchell,

Re: Referral of Patient — James R. Thompson (DOB: 14/03/1985)

I am writing to refer the above-named patient for further evaluation and management of suspected cardiac arrhythmia. Mr. Thompson has been under my care for the past three years and recently presented with recurring palpitations, dizziness, and shortness of breath on exertion.

An ECG performed on 28 July 2026 revealed intermittent irregular rhythms suggestive of atrial fibrillation. Blood pressure remains within normal limits (128/82 mmHg), and baseline blood work including thyroid function and electrolytes returned unremarkable results.

I would greatly appreciate your expert opinion and any diagnostic workup you deem appropriate, including a Holter monitor or echocardiogram. Enclosed please find his recent ECG tracing and laboratory results.

Mr. Thompson is aware of this referral and available at your earliest convenience.

Kind regards,

Electronically signed by:
